

SIMPLE. SEAMLESS. SMARTER.

INTRODUCING THE PREMISEAL ROOFING SYSTEM

The PremiSeal polyurethane spray foam roofing system is a long-term, sustainable roofing solution that is **seamless, watertight and virtually maintenance free**. Our two-step roofing system provides superior insulating power, dramatically improves your building's resistance to severe weather and incorporates a reflective surface for unmatched energy efficiency.

IS PREMISEAL RIGHT FOR YOUR ROOF?

The versatile PremiSeal roof system can be installed as a new roof over most roof decking substrates, or can be applied over an existing built up roofing system, offering a cost effective alternative to a complete tear-off. PremiSeal is designed for commercial, industrial and institutional applications, and is compatible with most common roofing materials and roof deck substrates.

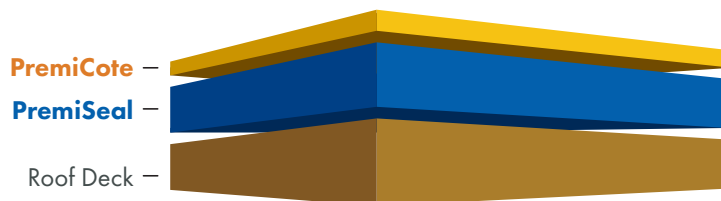

The high R-Value and low air filtration of PremiSeal closed cell spray polyurethane foam reduces energy usage for any structure.

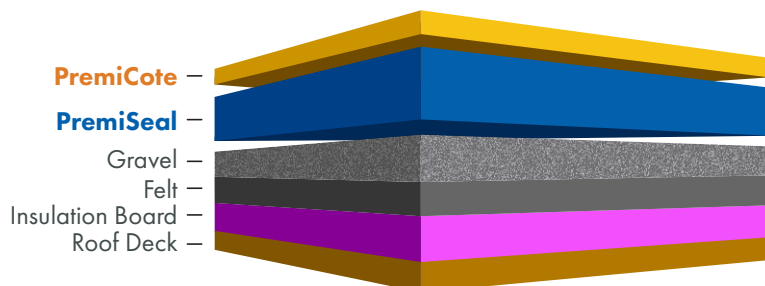

An additional PremiCote[™] seal creates a tough, weather-tight layer with UV light protection, also it gives you a **longer-lasting roof** that **saves you money on repairs** in the long term, and **reduces energy costs** from day one.

INSTALLATION DIRECTLY TO SUBSTRATE

INSTALLATION OVER EXISTING BUILT UP ROOF

The PremiSeal Spray Polyurethane System gives you a seamless, monolithic roof with no joints, seams or cracks—so moisture, heat and cold can't get in. Period.

PREMISEAL DELIVERS:

- > A continuous, leak-free seal over the entire roof
- > Superior insulation performance with closed cell foam
- > Energy efficient and light reflective
- > Excellent adhesion to substrate
- > Fast installation
- > Long-lasting, sustainable investment
- > Pays for itself in energy savings
- > Environmentally Friendly, EPA approved, zero ozone-depleting blowing agent

Re-covering or replacing your roof with PremiCote™ gives you a **longer-lasting roof** that **saves you money on repairs** in the long term and **reduces energy costs** from day one.

The PremiSeal Roofing system provides a seamless, leak-free, low-maintenance roofing option with excellent self-adhering qualities, superior wind uplift and excellent resistance to wear and tear.

OUR CONTRACTORS

Every contractor in our network of authorized spray foam insulation applicators has the professional training, safety credentials and experience to deliver the highest level of service and customer satisfaction.

ALL CLOSED CELL SPRAY FOAMS ARE NOT CREATED EQUAL —

Our proprietary formulas are carefully designed and thoroughly tested to provide our customers with the highest quality, most consistent result and best overall performance.

All formulations of PremiSeal™ offer excellent adhesion to most construction materials including wood, masonry, concrete, metal and most roofing board stock materials.
